Email sheepcreek@verizon.net / www.sheepcreekwater.com

NOTICE OF ANNUAL MEETING OF SHAREHOLDERS

NOTICE IS HEREBY GIVEN, that the Annual Meeting of the Shareholders of Sheep Creek Water Company, a California corporation, will be held virtually through Zoom or telephone conference, originating at 4200 Sunnyslope Rd Phelan, California, on **May 15, 2021 at 10:00 a.m.,** local time, for the following purpose:

The Sheep Creek Water Company Annual Shareholders Meeting will be held via teleconference or video conference due to the ongoing Covid-19 pandemic and related, state-imposed social distancing and maximum gathering size restrictions. The Board of Directors will hold the meeting at the Sheep Creek Company Office and Shareholders may watch and participate electronically in the meeting via Zoom or telephone conference. Consistent with action taken by the Board at the Regular Board of Directors Meeting on March 18, 2021, the Annual Shareholders Meeting will be informational only. No voting, either on proposals or Board positions, will occur, as the Company does not currently have the resources to ensure the integrity of remote or virtual voting. Election of members of the Board of Directors is postponed for a period of one year and the present Directors shall continue to hold their positions until that time. The login information and comment procedure is listed below.

REMOTE PARTICIPATION INFORMATION:

AGENDA ITEMS OF THE ANNUAL SHAREHOLDERS MEETING

Agenda Item III a

System Update: With Covid-19 affecting everyone's lives, Sheep Creek Water Company (SCWC) continued to move forward with upgrades and improvements to the water system. The field crew completed several Fire Hydrant and valve replacement jobs. Old stand pipes were replaced with new up to date fire hydrants. There are several more locations planned for 2021. The project to convert all regulator stations to stainless steel controls is near complete. Meter replacements are an ongoing effort with old service lines also being replaced to reduced leaks and water loss in the system.

Water levels are currently seeing little increase in water levels and pumping capacities. Water levels continue to fluctuate, but remain below normal. Water production from all sources has slightly increased the past year but remain below normal production. Well 3A which was installed in 2002 had a complete rehabilitation. The casing was scrubbed and the pumping equipment replaced. The pipework was brought up to the current standards. The new Well 11 has been completed along with the installation of automated controls (SCADA). Well 11 pumps directly into the system and is producing up to 300 gallons per minute (gpm) based on the water use of the customers. The water level in Well 11 has remained consistent. The Tunnel has seen a slight increase in water production, but continues to remain below normal. As of April 1, 2021 the Tunnel is currently averaging 133 gpm which is an increase of 10 gpm with SCWC's total production at 2,074 gpm. With water levels and production continue to be below normal, which means water allotments will remain. SCWC experienced years of dry winters and the area will need several years of above normal winters to recharge the water table.

Agenda Item III b

SWRCB Compliance Order Update: August 30, 2018, Compliance Order NO. 05-13-18R-002 was issued by the State Water Resources Control Board (SWRCB) Drinking Water Division. The SWRCB placed a service connection and building moratorium on SCWC. SCWC cannot place any new service connections or cannot issue any "Will Serve Letters" for any building permits. Due to the drought in California, SCWC's well levels and production declined and in June of 2016 well production dropped significantly. Again in 2018 well production dropped to a total of 502 gpm causing the SWRCB to issue a Source Capacity Violation due to SCWC unable to meet the required 10 Year Maximum Day Demand of 1,368 gpm. The MDD of 1,368 is based on the highest production in 10 years which was in July 2014. In order for SCWC to meet the required 10 year MDD, SCWC needs to increase production an additional 866 gallons per minute. Even with production increasing, the SWRCB is using SCWC lowest production when calculating the MDD.

During the Special Meeting of the Shareholders in August 2019, the Shareholders voted to drill wells as needed (up to four wells) to achieve compliance. SCWC submitted a corrective action plan to the SWRCB and was approved in January 2020 with an updated Compliance Order NO. 05-13-18R-002A l issued March 17, 2020 with a compliance date of December 2023. In addition to the updated compliance order, the SWRCB required SCWC to complete a Financial Review and an Asset Management Plan. Both are available to view at https://sheepcreekwater.com

Agenda Item IV a

Source Capacity Project Update & Loan Repayment-Information Only: The Source Capacity Project was approved by the Shareholders in August 2019 to achieve Source Capacity Compliance. Following Shareholder approval, the Board began moving forward with the project. The company applied for a \$4,000,000

line of credit for the installation of up to four wells. Included with the line of credit was a \$410,000 loan to refinance the existing shareholder loans at a lower interest rate of 2.4%. Two parcels of land have been purchased for the installation of 2 wells and a third parcel is in a contract for a third well with the purchase of the land contingent on available water on the property. The California Environmental Quality Act (CEQA) work has been completed for two wells and possibly a well on the company's office property. A test well may be drilled at the company's office property. The CEQA work took approximately one year to complete and an additional document will need to be completed for the additional property that was purchased. If necessary the CEQA will begin for the additional property once we begin drilling the first two wells. At this time the line of credit has not been used as the expenses for the property purchases and the CEQA Consultant have been paid for with the Tier 3 overage charges. The next in person Shareholders meeting, the Shareholders will at that time vote on the payment options to repay the Line of Credit for the new wells. The line of credit has not been used and no voting for payment is needed at this time. At this time, the Source Capacity Project has been put on temporary hold due to additional consolidation opportunities with the Phelan Pinon Hills Community Service District.

Agenda Item IV b

Consolidation of Sheep Creek Water Company with Phelan Pinon Hills Community Service

District- Information Only: Sheep Creek Water Company (SCWC) was approached by Phelan Pinon Hills Community Service District (PPHCSD) in September 2020 regarding consolidation of SCWC into PPHCSD. PPHCSD stated there are additional funding opportunities available through the State Water Resources Control Board (SWRCB) Division of Financial Assistance (DFA) to fund the consolidation projects. The prior consolidation effort only allowed up to five million dollars in grant funding along with up to five million dollars in loans. The funding from the SWRCB DFA allows for significantly higher grant funding which will allow the Shareholders to sell the Sheep Creek Water Rights and give compensation for the shares along with the additional funding for system replacements and upgrades to the Sheep Creek District. A new well will be included with the funding which will be a benefit to the community. Upon future Shareholder approval of consolidation, the Shareholders would also need to approve to sell the water rights which would give the Shareholders compensation for their shares they own. The consolidation investigation is in the early stages and is currently in the grant process with a Technical Assistance provider with the SWRCB-DFA. As information becomes more available, updates will be posted on the Sheep Creek Website and updates will be sent to the Shareholders. Once more information is available to hold a vote, the item will be brought back to the Shareholders for a vote. If it is necessary, a Special Meeting of the Shareholders may be held and notice will be sent.

Below is a list the Board has put together as negotiations proceed forward:

- Compensation for Shares- Compensation will be achieved with sale of water rights
- Transfer water system infrastructure and property to PPHCSD
- Customers to be transferred into PPHCSD system at no additional cost or fees
- SCWC Customers to be integrated into PPHCSD
- All fees and rates for SCWC customers to be the same as PPHCSD customers
- Meter requirements and regulations to be the same for SCWC customers as PPHCSD customers
- Districts to operate as one and not two separate districts, all customers treated equal.
- Existing SCWC Employees to be protected and brought onto PPHCSD staff

Any question that you may have prior to the Shareholder Meeting can be emailed to the Sheep Creek Office prior to the meeting. Questions will be read into the meeting by the Board Secretary and discussed by the Board. Please check the Agenda for the question and comment procedure. Please feel free to join the Sheep Creek Water Company Board of Directors for an informational meeting and an update of the Sheep Creek Water Company.

FINANCIAL STATEMENT

SHEEP CREEK WATER COMPANY

FOR THE YEAR ENDING DECEMBER 31, 2020

CECELIA J. CUMMINGS, CPA

6074 PARK DRIVE, STE 1 P. O. BOX 1960 WRIGHTWOOD, CA 92397

March 27, 2021

Board of Directors Sheep Creek Water Company P.O. Box 291820 Phelan, CA 92329-1820

The Financial Report for the year ending December 31, 2020 which includes the Balance Sheet, Statement of Income and Expenses, Statement of Changes in Financial Position and accompanying footmotes for Sheep Creek Water Company has been compiled by us on an accrual basis. A compilation is limited to presenting in the form of financial statements information that is the representation of management. We have not audited the accompanying financial statements and, accordingly, do not express an opinion or any other form of assurance on them.

Management is responsible for the preparation and fair presentation of the financial statement in accordance with accounting principles general accepted in the United States of America and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

Our responsibility is to conduct the compilation in accordance with Statement on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accounting. The objective of a compilation is to assist management in presenting financial information in the form of financial statement without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements.

SHEEP CREEK WATER COMPANY NOTES TO FINANCIAL STATEMENTS For the Year Ended December 31, 2020

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Inventories:

Inventories consist primarily of pipe and related parts necessary for line and meter installation and are stated at the lower of cost or market using the first-in, first-out method.

Property and Equipment:

Property and equipment are stated at cost. Depreciation is computed using the straight-line method for financial reporting purposes based on the following estimated useful lives of the assets:

| | Years |
|------------------------|---------|
| Buildings | 20 - 25 |
| Equipment | 3 - 7 |
| Furniture and Fixtures | 3 - 10 |
| Vehicles | 3 - 7 |
| Water System | 15 - 75 |
| Wild Horse Canyon | 20 - 45 |
| Master Plan | |

Prepaid Assets:

Prepaid items are those expenses that are paid in the current accounting period, but which the individual asset will not be consumed or recognized until the future year. As the asset is used, it is charged to an expense account.

The Company recognizes prepaid assets for expense items as software, dues and subscriptions, insurance, property tax and equipment deposits.

Income Taxes:

Federal Tax

No provision has been made for Federal Income Taxes as the Company is a non-profit organization exempt from Federal Income Tax.

State Tax

Bank and Corporation tax code, Section 24405, states that for mutual or cooperative associations all member income and any income from nonmembers received on a non-profit basis is exempt. Section 24425, provided that expenses associated with exempt income are not deductible. Section 24437 allows expenses related to member services only to the extent of member income. Necessary adjustments are made to eliminate this income and expense. Interest income is deemed to be taxable income and does not fall under the exempt code.

2. NATURE OF BUSINESS:

The Company engages in the business of providing the service of water to its' shareholders at cost.

SHEEP CREEK WATER COMPANY NOTES TO FINANCIAL STATEMENTS For the Year Ended December 31, 2020

3. PROPERTY PURCHASE

Source Capacity Project was approved by the Shareholders in August 2019. The Company purchased three parcels of land for new wells for a cost of \$60,500. One parcel for Well 13 is located on Mescalero Rd and two parcels located on Johnson Rd & Yucca Terrace Dr for Well 14.

4. LONG TERM LIABILITIES

EQUIPMENT

The Company purchased a skiploader from CNH Industrial Capital for \$91,387.56 and entered into an agreement in February 2016 for a five year payment plan with \$1,382.85 per month with an interest rate of 3%.

The Company purchased a Ford F150 work truck from Sunrise Ford for \$32,094 and entered into an agreement in July 2017 for a five year payment plan with \$548 per month with an interest rate of 4.85%.

The Company purchased a Chevrolet Silverado work truck from Performance Chevrolet for \$58,669 and entered into an agreement in June 2018 for a five year payment plan with \$913 per month with an interest rate of 4.69%.

NOTES PAYABLE

A shareholder and the Company have entered into an agreement in September 2016 for a loan to the Company in the amount of \$170,000 at 6% over five years with the first year's payments to be interest only and the principal to be paid over the remaining four years. The balance of \$127,899.78 was refinanced in September 2018 with an additional shareholder loan of \$300,000. The new balance of \$427,899.78 was approved at 6.50% over five years. The payments will be interest only for five years along with five annual principal payments each end of period of September. The liability is scheduled to be retired in September 2023. On June 2, 2020, the balance of \$342,320 was refinanced with a Single Advance Term Promissory Note with CoBank and the loan with this shareholder is paid in full.

A shareholder and the Company have entered into an agreement in December 2017 for a loan to the Company in the amount of \$100,000 at 5% over five years with the first year's payments commencing on the first anniversay of the date of the loan and continuing thereafter on the second (2nd) through the fifth (5th) anniversaries of the date of the Note. The liability is scheduled to be retired December 2022.

On June 2, 2020, the balance of \$342,320 was refinanced with a Single Advance Term Promissory Note with CoBank and the loan with this shareholder is paid in full.

On January 27, 2020, the Company entered into a Single Advance Term Promissory Note with CoBank for a single advance loan in the amount of \$410,000 to refinance the Company's indebtedness at that time for the two shareholder loans and associated closing costs. The term of the loan is 48 months to expire on June 20, 2024 at a rate adjusted for reserves of the One-Month LIBOR (London Interbank Offered Rate) Index Rate plus 1.75%.

2021

State Water Resources Control Board Division of Drinking Water

March 17, 2020

System No. 3610109

Chris Cummings, General Manager Sheep Creek Water Company P.O. Box 291820 Phelan, CA 92329 sheepcreek@verizon.net

COMPLIANCE ORDER NO.05_13_18R_002A1 SOURCE CAPACITY VIOLATION

Enclosed is Compliance Order No. 05_13_18R_002A1 (hereinafter "Order"), issued to the Sheep Creek Water Company public water system (hereinafter "System"), public water system. Please note there are legally enforceable deadlines associated with this Order.

The System will be billed at the State Water Resources Control Board's (hereinafter "State Water Board"), hourly rate for the time spent on issuing this Order. California Health and Safety Code (hereinafter "CHSC"), Section 116577, provides that a public water system must reimburse the State Water Board for actual costs incurred by the State Water Board for specified enforcement actions, including but not limited to, preparing, issuing and monitoring compliance with an order. At this time, the State Water Board has spent approximately 2 hour(s) on enforcement activities associated with this violation.

The System will receive a bill sent from the State Water Board in August of the next fiscal year. This bill will contain fees for any enforcement time spent on the System for the current fiscal year.

Any person who is aggrieved by a citation, order or decision issued under authority delegated to an officer or employee of the state board under Article 8 (commencing with CHSC, Section 116625) or Article 9 (commencing with CHSC, Section 116650), of the Safe Drinking Water Act (CHSC, Division 104, Part 12, Chapter 4), may file a petition with the State Water Board for reconsideration of the citation, order or decision.

E. JOAQUIN ESQUIVEL, CHAIR | EILEEN SOBECK, EXECUTIVE DIRECTOR

Petitions must be received by the State Water Board within 30 days of the issuance of the citation, order or decision by the officer or employee of the state board. The date of issuance is the date when the Division of Drinking Water mails a copy of the citation, order or decision. If the 30th day falls on a Saturday, Sunday, or state holiday, the petition is due the following business day by 5:00 p.m.

Information regarding filing petitions may be found at:

http://www.waterboards.ca.gov/drinking water/programs/petitions/index.shtml

If you have any questions regarding this matter, please contact Hector Cazares of my staff at (909) 383-4312 or me at (909) 383-4328.

Sincerely,

Sean F. McCarthy, P.E.

Chief, South Coast Section

| 21 | 2018 |
| 22 | |
| 23 | The California Health and Safety Code (hereinafter "CHSC"), Section 116655 authorizes |
| 24 | the State Water Resources Control Board (hereinafter "State Water Board"), to issue a |
| 25 | compliance order to a public water system when the State Water Board determines that |
| 26 | the public water system has violated or is violating the California Safe Drinking Water |
| 27 | Act (hereinafter "California SDWA"), (CHSC, Division 104, Part 12, Chapter 4, |
| | |

commencing with Section 116270), or any regulation, standard, permit, or order issued or adopted thereunder.

The State Water Board, acting by and through its Division of Drinking Water (hereinafter "Division"), and the Deputy Director for the Division, hereby issues Compliance Order No. 05_13_18R_002A1 (hereinafter "Order") pursuant to Section 116655 of the CHSC to the Sheep Creek Water Company (hereinafter "System"), for violation of CHSC, Section 116555(a)(3), requiring a reliable and adequate supply of pure, wholesome, healthful, and potable water, and California Code of Regulations (hereinafter "CCR"), Title 22, Section 64554, setting source capacity requirements.

STATEMENT OF FACTS

The System is classified as a community public water system with a population of 3,354 serving 1,183 connections. The System operates under Domestic Water Supply Permit No. 78-007 issued by the State Water Board on February 9, 1978.

The System relies on six (6) groundwater wells: Wells 2A, 3A, 4A, 5, 8, 11 and one (1) tunnel source which is also classified as groundwater.

As a result of Compliance Order No. 05-13-18R-002 the State Water Board imposed a service connection moratorium which directed the System to not make any additional service connections to its water system, including any such service connections for which a "will serve" letter was issued at any time by the System, but for which a building permit was not issued prior to the date of Compliance Order No. 05-13-18R-002.

On November 28, 2018 the State Water Board permitted Well 11 as an approved potable source for the System. The well is equipped to supply up to 251 gallons per minute (gpm) into the distribution system per the initial pump test completed on July 16, 2018.

27

On January 14, 2019 the System completed a feasibility report addressing the water source capacity issue which included an assessment of consolidation with a nearby public water system. The feasibility report has been attached to this Order as Appendix 1. The feasibility study discussed cost estimates, including the operation and maintenance (O&M) costs, and the potential environmental impacts of each of the options considered. The report identified and assessed two alternatives; either maintain the System as an independent water purveyor by drilling and operating additional water supply wells to meet MDD requirements or have the System consolidate with Phelan Pinon Hills Community Services District. In accordance with the feasibility study the cost for consolidation would amount to a net present value of \$3.4 million dollars including operation and maintenance costs in comparison to the net present value of \$6.5 million dollars including operation and maintenance costs to maintain the System as a public water purveyor and drill additional sources. Based on the cost analysis of the feasibility report, the consolidation with Phelan Pinon Hills Community Services District would be the more feasible alternative. However, based on discussions with the System's general manager and the System's board of directors, the preferred alternative was identified in the report as maintaining the System as an independent water purveyor by drilling and operating additional water supply wells to meet MDD requirements.

On August 17, 2019 the System held a special meeting for System shareholders to present the alternatives for compliance. Based on the System's voting procedure the shareholders gave authority to proceed with drilling the additional sources required to meet the System's source capacity requirements rather than consolidate with Phelan Pinon Hills Community Services District. This information was provided by the System to the Division from a letter submitted by the System on August 28, 2019. The letter has been attached to this Order as Appendix 2.

On August 28, 2019 the Division received a corrective action plan which stated that with the approval of the System's shareholders, the System's board of directors is prepared to proceed with the development of additional water source facilities to bring the System into compliance with source capacity requirements. Based on the timeline included in the corrective action plan the System will be in compliance with source capacity requirements by no later than October 1, 2023. The corrective action plan was approved by the Division on January 3, 2020 and has been attached to this Order as Appendix 2. As part of the corrective action plan's approval the Division has addressed financial concerns on the feasibility of this project. Within the approval the Division has stated that the System should assess all the financial risks that could result from this project and has advised the System to be prepared in budgeting the project without causing financial hardship on the System or its shareholders.

CHSC, Section 116555(a)(3) requires all public water systems to provide a reliable and adequate supply of pure, wholesome, healthful, and potable water and CCR, Title 22, Section 64554(a) requires that public water systems shall at all times have the capacity to meet the System's maximum day demand (MDD) as established by Section 64554 subsection (b).

DETERMINATION

Based on the above Statement of Facts, the State Water Board has determined that without additional source capacity, the System may not be able to provide an adequate and reliable supply of water to its customers and has failed to comply with requirements from CHSC, Section 116555(a)(3) and CCR, Title 22, Section 64554. The Division has the authority under Sections 116655 (a)(2) and 116655 (b)(4) of the CHSC to take steps necessary to prevent increasing water demands for the System until such time that an adequate and proven source capacity is provided.

DIRECTIVES

To ensure that the water supplied by the System is at all times reliable and adequate, the System is hereby directed to take the following actions:

- 1. Upon receipt of this Order, the Division continues to impose a service connection moratorium on the System and directs the System to not make any additional service connections to its water system, including any such service connections for which a "will serve" letter was issued at any time by the System, but for which a building permit was not issued prior to the date of Compliance Order No. 05-13-18R-002 being issued. As used in this Order, "will serve" letter means any form of notice, representation or agreement that the System will supply water to a property, parcel or structure
- 2. Per Section 116530 of the California Health and Safety Code, the Division requires that information related to the System's financial capacity be submitted no later than August 31, 2020. For the purpose of this directive, the financial information must include, but is not limited to the following:
 - a. An overall evaluation of the financial health of the system by a Certified Public Accountant or appropriately qualified financial officer. The evaluation must include and take into consideration audited financial statements from the past 5 years, monthly revenue and expenses from the past 5 years, management and status of outstanding debt and impending debt that will be accrued as a result of the requirements outlined in this Order and from any other planned water system expenses, documentation demonstrating how funding for the requirements outlined in this Order will be secured and financed, information on the expected increase in operational expenses due to the requirements outlined in this Order, management and status of the System's reserve funds, and information on

the System's rate structure and any proposed rate increases that are anticipated. The evaluation must include a concluding statement on the System's overall current and anticipated financial health.

- b. An asset management plan (AMP) must be completed by the System. The AMP must include an inventory of the System's infrastructure components, a description of the components' condition, age, service history, and useful life, criteria to determine when to repair, rehabilitate or replace assets, a prioritization of critical assets, long term funding strategies, and a timeline delineating the schedule for the System's asset management plan.
- c. A summary of operational costs associated with operation of Well 11. The summary must consider average operational costs and usage since the issuance of the Division's permit for Well 11 on November 28, 2018.
- d. The System must complete the Financial Assessment Questionnaire for Disadvantaged Medium/Large Community Water Systems included in Appendix 3 of this Order. The questionnaire provides several resources and guidance documents that are available to assist the System in completing items a & b of this directive.
- As stated in Directive No. 8 of Compliance Order No. 05-13-18R-002 the System
 must perform the State Water Board approved Corrective Action Plan, and each
 and every element of said plan, according to the time schedule set forth therein.
- 4. In accordance with CCR, Title 22, Section 64554(a), a public water system must at all times have adequate source capacity to meet the highest 10-year MDD, which for the System would be 1,970,000 gallons per day recorded from July 2014. Using the System's most conservative production yield records from July 2018, the System only produced a combined source flow of 720,000 gallons per day. Since the System's lowest production yield in July 2018, Well 11 was installed, adding an additional 360,000 gallons per day in source capacity.

Therefore, the System must construct and submit permit application(s) for additional water supply sources until an additional 890,000 gallons per day of production is achieved, which equates to the difference between the System's 10-year MDD and its lowest record of production. The System shall achieve compliance with all source capacity requirements as described in CCR, Title 22, Section 64554 no later than **December 1, 2023.** A source capacity evaluation has been included in Appendix 4 of this Order.

- 5. Per the State Water Board approved Corrective Action Plan, the System shall have Well No. 12 constructed and equipped for operation into the distribution system no later than **June 1, 2022**.
- Per the State Water Board approved Corrective Action Plan, the System shall have Well No. 13 constructed and equipped for operation into the distribution system no later than November 1, 2022.
- 7. Per the State Water Board approved Corrective Action Plan, if deemed necessary to comply with source capacity demand requirements as described in Directive 3 of this Order, the System shall have Well No. 14 constructed and equipped for operation into the distribution system by no later than **June 1, 2023**.
- 8. Per the State Water Board approved Corrective Action Plan, if deemed necessary to comply with source capacity demand requirements as described in Directive 3 of this Order, the System shall have Well No. 15 constructed and equipped for operation into the distribution system by no later than **November 1, 2023.**
- 9. The System must complete and submit to the Division pump tests for all sources demonstrating compliance with the source capacity requirements described in Directive 3 of this Order no later than December 1, 2023. Pump tests shall be

| Ĩ | completed in accordance with the procedures stated under CCR, Title 22, Section |
|--------|---|
| 2 | 64554(f). |
| 3 | |
| 4 | 10.On or before April 10, 2020 and every three months thereafter, submit a report |
| 5 | to the State Water Board in the form provided as Appendix 5 showing actions |
| 6 | taken during the previous quarter (calendar three months) to comply with the |
| 7 8 | Corrective Action Plan. |
| 9 | 11.On or before April 10, 2020 and every month thereafter, submit a report to the |
| 10 | State Water Board summarizing source production and consumption data for the |
| 11 | previous month. |
| 12 | |
| 13 | 12.On or before April 17, 2020 complete and return to the State Water Board the |
| 14 | "Notification of Receipt" form attached to this Order as Appendix 6. Completion |
| 15 | of this form confirms that the System has received this Order and understands |
| 16 | that it contains legally enforceable directives with due dates. |
| 17 | |
| 18 | All submittals required by this Order, with exception of analytical results, must be |
| 19 | electronically submitted to the State Water Board at the following address. The subject |
| 20 | line for all electronic submittals corresponding to this Order must include the following |
| 21 | information: Water System name and number, compliance order number and title of the |
| 22 | document being submitted. |
| 23 | |
| 24 | Eric J. Zúñiga, District Engineer |
| 25 | Dwpdist13@waterboards.ca.gov |
| 26 | |
| | |

The State Water Board reserves the right to make modifications to this Order as it may 1 deem necessary to protect public health and safety. Such modifications may be issued 2 as amendments to this Order and shall be effective upon issuance. 3 4 Nothing in this Order relieves the System of its obligation to meet the requirements of 5 the California SDWA (CHSC, Division 104, Part 12, Chapter 4, commencing with Section 6 116270), or any regulation, standard, permit or order issued or adopted thereunder. 7 8 PARTIES BOUND 9 This Order shall apply to and be binding upon the System, its owners, shareholders, 10 officers, directors, agents, employees, contractors, successors, and assignees. 11 12 SEVERABILITY 13 The directives of this Order are severable, and the System shall comply with each and 14 every provision thereof notwithstanding the effectiveness of any provision. 15 16 17

FURTHER ENFORCEMENT ACTION

The California SDWA authorizes the State Water Board to issue a citation or order with assessment of administrative penalties to a public water system for violation or continued violation of the requirements of the California SDWA or any regulation, permit, standard, citation, or order issued or adopted thereunder including, but not limited to, failure to correct a violation identified in a citation or compliance order. The California SDWA also authorizes the State Water Board to suspend or revoke a permit that has been issued to a public water system if the public water system has violated applicable law or regulations or has failed to comply with an order of the State Water Board, or to petition the superior court to take various measures against a public water system that has failed to comply with an order of the State Water Board, including issuance of an injunction to enforce a compliance plan, enjoining further service connections, or any other relief that may be required to ensure compliance with the SDWA and applicable regulations. The State Water Board does not waive any further enforcement action by issuance of this Order.

CORRECTIVE ACTION PLAN

SWRCB Compliance order NO 05-13-18R002

June 2019 Updated August 28, 2019

Sheep Creek Water Company (SCWC) is a private Shareholder owned Water Company with approximately 1,400 shareholders totaling 8,000 shares in the company servicing a portion of the community of Phelan. The majority of SCWC's water supplies come from an underground Tunnel and 5 ground water wells within the Swarthout Canyon. The SCWC water system is recognized by the State Water Resources Control Board (SWRCB), Division of Drinking Water (DDW) as Sheep Creek Water Company (Water System No. CA3610109). The water system is classified as a Community Water System and supplies water for domestic purposes to the unincorporated portions of San Bernardino County in Phelan, CA. DDW regulates the water system under Domestic Water Supply Permit No.78-007 as issued on February 9, 1978 with the newest permit amendment for Well #11 dated November 28, 2018.

Due to drought conditions in the State of California and below average rainfall in the area, in 2016, water supplies within the Swarthout Canyon continued to decline. February 2016, SCWC was capable of producing 3,001 gpm suppling an allotment of 1,000 cubic per share to the 8,000 shares available in the company. May 2016 supply dropped to 2,569 gpm with weekly drops in production and water levels. By the end of August 2016 production on the SCWC supply was down to 640 gpm. Due to the drops in production, the Board of Directors began to lower the allotment on shares to cut water use to remain within production. SCWC received water from Phelan Pinon Hills Community Service District (PPHCSD) from August 2, 2016 through September 6, 2016.

In preparation of the 2017 summer and continued lack of recharge in the Sheep Creek Canyon, the Board of Directors continued to cut the allotment to keep consumption within the available production. In spring 2018, SCWC began to see additional drops in production and water levels with the high of 1,301 gpm in February 2018 and the lowest production in July 2018 at 502 gpm. The Board of Directors continued to implement drastic cuts in the water allotment along with implementing a tiered water rate and increasing overage charges. SCWC began to receive water from PPHCSD on August 10, 2018 and on August 22, 2018, SCWC notified the SWRCB that SCWC will continue to purchase water from PPHCSD. SCWC purchased water from PPHCSD until August 30, 2018.

On August 30, 2018, SCWC received a Compliance order from the SWRCB for a Source Capacity Violation due to SCWC unable to meet the Max Day Demands (MDD). The highest recorded MDD was on July 12, 2014 with a total production of 1.78 million gallons per day (MGD). Upon the receipt of the Compliance Order, SCWC was nearly complete with a secondary source of supply within the Mojave

Water Agency boundaries located in the Alto Sub Basin. Well #11 was approved and permitted by the SWRCB, DDW on November 28, 2018 with a production of 251 gpm.

As required by the SWRCB Compliance Order, a feasibility study by Infrastructure Engineering Corporation (IEC) was completed with two alternative plans for bringing SCWC into compliance. Due to SCWC being a Shareholder owned company overseen by a Board of Directors elected by the Shareholders, the Board began exploring both alternatives for compliance. The Board of Directors planned to present both alternatives to the Shareholders at the SCWC Annual Shareholders Meeting on May 11, 2019 but did not have enough information regarding consolidation to ask for a vote. SCWC sent a letter to the SWRCB-DDW on April 19, 2019 requesting an extension of time to have a vote of the Shareholders as to the preferred alternative of compliance. On May 10, 2019, the SWRCB-DDW granted SCWC an extension of time until August 31, 2019 for preferred plan of compliance.

The following timeline for Shareholder approved alternative compliance plan:

- Revised Compliance Plan Due- June 1, 2019
- PPHCSD Discussions and Consolidation Plan- June 2019 July 2019
 - o SCWC proposed consolidation plan to be submitted to PPHCSD- June 7, 2019
 - o Appraisal of Sheep Creek Water District- July 1, 2019
 - o Additional Committee Meeting(s) to discuss proposed consolidation
- Discuss with SWRCB-DFA for available funding opportunities
- Prepare Special Shareholders Meeting- July August 2019
 - o Prepare agenda with proposed alternatives of compliance
 - \circ Prepare information and material for Shareholders- July 1 12, 2019
 - o Send information to Shareholders for Special Meeting- July 17, 2019
- Special Shareholders Meeting- August 17, 2019
 - Vote of the Shareholders to approve preferred alternative for compliance
- Notify SWRCB-DDW of Shareholder approved alternative for compliance- August 30, 2019

Drill Additional Well for Source Capacity Compliance

SCWC has taken action over the past several years to reduce the systems MDD. SCWC began reducing water allotments along with reducing demand in May 2015 with the implementation of the Governor of California's Drought Regulation, mandating a 20% reduction in all water use. Along with the reductions in 2015, the SCWC Board of Directors continued to reduce water allotments as water levels and production began and continued to fall. The SCWC Board of Directors also implemented a Tiered water rate structure to reduce additional water use over Shareholders allotment.

SCWC began taking action to alleviate the source capacity issues with the approval of Well #11, to be located outside of the company's exiting well field and drilled within the Alto Sub Basin located within the Mojave Water Agencies Boundaries. CEQA was completed in early 2018 and the well was drilled and completed by fall 2018. The SWRCB approved the well into the system in November 2018 after the Source Capacity Violation was issued. The increased capacity of .36 MGD combined with the lowest capacity of .72 MGD brings the total pumping capacity of SCWC to 1.08 MGD leaving a deficit of .70 MGD. The 1.08 MGD does not take into account the regulation of the highest producing source being taken offline.

With the recommendation from the required feasibility study that was completed by IEC, up to four additional wells will need to be drilled within the SCWC water district. The assumption of four wells is based on the recently completed SCWC Well #11. Well #11 was drilled to a depth of 1,500 feet with a production of 250 GPM at a water level of approximately 950 feet below ground surface. Following approval from the SCWC Shareholders to move forward, the Board of Directors will begin the process for the installation of the first well (Well #12) in the project. SCWC will continue to drill the additional wells as needed to produce the additional .70 MGD. With the assumption that the additional wells produce .36 MGD as Well #11, a total of three wells may need to be drilled to meet the SWRCB regulation for a water systems MDD.

SCWC will locate the new wells within the best location of existing pipeline infrastructure. With locating the wells within areas of the water system that have larger diameter pipelines, this will reduce the infrastructure needed to connect the wells to the system along with reducing the cost to the Shareholders. As of this time, the cost, construction, water production and water quality for all additional wells are being based on the newly completed Well #11. Water quality is unknown and is not taken into account in the proposed timeline. Water quality will be addressed if necessary following the completion of title 22 water quality sampling.

With Shareholder approval to drill additional wells, the following will be completed for compliance:

- Continue working with CRWA for funding of new wells and possible infrastructure upgrades
- CEQA compliance for each well project needed
 - o If possible, projects to be combined
- Installation of Well #12 & 13
 - o Drill well with estimated depth of 1,500 feet
 - 12 16 inch diameter casing with estimated 500 foot louvered section
 - o Test pump well with estimated production of 250 GPM or .36 MGD
 - o Application for Southern California Edison- Electrical Service
 - Installation of pumping equipment
 - Well head pipe work
 - Onsite and offsite pipe work to connect to water system- Estimated distance 500 feet
 - o Installation of electrical equipment and SCE service
- Installation of Well #14 & 15 (If Necessary for Compliance)
 - o Drill well with estimated depth of 1,500 feet
 - 12 16 inch diameter casing with estimated 500 foot louvered section
 - o Test pump well with estimated production of 250 GPM or .36 MGD
 - o Application for Southern California Edison- Electrical Service
 - Installation of pumping equipment
 - Well head pipe work
 - o Onsite and offsite pipe work to connect to water system- Estimated distance 2800 feet
 - Installation of electrical equipment and SCE service

Funding SCWC has been working with the California Rural Water Association (CRWA) for two years to acquire grant funding to bring SCWC into compliance and complete additional projects within the water district. SCWC will continue to work with CRWA to seek funding from SWRCB-DFA for

completion of the additional wells as recommend in the Final Engineering Report that was submitted in July 2019.

SCWC is working with a funding consultant, Waterfunder LLC, for private funding along with possible additional grant funding that may be available. The options for payment of the loans will be put to the Shareholders to vote on payment options.

Estimated cost per well is based on similar design as Well #11:

- \$900,000 per well with pipeline & electrical installation
 - o Estimated cost per share per well for loan repayment-\$150 per share
 - Estimated cost is based on 10 year loan with assessment collection cost
 - Estimated cost per service connection per month per well for loan repayment-\$8.00 per service-\$960 per meter service
 - Estimated cost is based on 10 year loan with interest
- Upon approval by the SWRCB-DDW, as additional source capacity becomes available, SCWC
 can begin issuing new service connections with the additional funds to be available for the wells
 or any outstanding loans lowering the cost to the existing water users and Shareholders.

<u>Timeline for Compliance</u> With approval of the SCWC Shareholders to move forward with drilling additional wells within the SCWC water system, staff will begin moving forward with well locations for the additional wells. The plan is to work on the first two wells concurrently if possible to cut time on the project. Following approval of locations from the Board of Directors, CEQA documents will be completed and submitted. During the CEQA process, property acquisition will be completed, necessary permitting will begin and Bids will be submitted for well drilling. Following completion of test pumping, SCE application will be made, pumping equipment installed, on and off site pipe work will be completed concurrently. Documentation will be submitted to SWRCB-DDW for approval of a new water source.

Estimated Project Timeline

| ID Ta | ask Name | Duration | Estimated Start Date | Estimated Completion Date |
|-------|-----------------------------------|----------|----------------------|---------------------------|
| 1. | Project | | September 2019 | June 2023 |
| 2. | Funding, Applications & Approvals | | September 2020 | |
| 3. | Well Site Location & Acquisition | | January 2020 | |

San Bernardino, CA 92401
Eric.Zuniga@waterboards.ca.gov

RE: Compliance Order NO 05-13-18R-002A1; Required Directives 2a, 2c, 2d

Dear Mr. Zuniga:

As required by Compliance Order NO 05-13-18R-002A1 issued March 17, 2020 to Sheep Creek Water Company (SCWC), Directives 2a - 2d are required to be submitted to the State Water Resource Control Board by August 31, 2020. On August 17, 2020, SCWC submitted for Extension of Time to complete Directive 2b due to the time necessary to complete an Asset Management Plan.

Summary of required Directives per Compliance Order NO 05-13-18R-002A1:

Directive 2a- An Evaluation of the Financial Health of the systems was completed by an independent CPA firm not affiliated with SCWC. SCWC contracted with Matt Miller of Silva & Silva CPA. The past 5 years of SCWC financial statements were reviewed along with projected income. SCWC implemented a Tiered Water Rate schedule increasing revenues for Reserve Accounts, system upgrades and replacement. Attached with this letter is the Independent Accountants Report along with 5 years of SCWC Financial Statements and the current SCWC Rate Schedule.

Directive 2b- An Asset Management Plan is to be completed by the system. SCWC Board of Directors approved a proposal to complete the Asset Management Plan on August 13, 2020. A request for Extension of Time was submitted on August 17, 2020. SCWC approved the Engineering firm IEC which is the same firm that completed the Feasibility Study that was required by Compliance Order NO 05-13-18R-002. The estimated timeline to complete the Asset Management Plan is 5-6 months.

Directive 2c- Operational Cost for Well 11 since the Divisions approval on November 28, 2018. Well 11 was drilled and installed into the SCWC system for a secondary source of water supplementing the existing Wrightwood Well Field. The Wrightwood Well Field is the primary

source of water supplying the Sheep Creek Shareholders. Due to issues with Southern California Edison, Well 11 ran with power from a diesel generator until October 2019 when electrical power was completed. The cost to operate Well 11 was higher with the generator which had an average cost of \$7.40 per Hundred Cubic Feet (HCF). Average operating cost for Well 11 during normal operating conditions is \$4.47 per HCF. When Well 11 is started up for minimal running such as monthly water sampling, the cost increases due to the initial electrical demand charge higher. The cost to run Well 11 is included into the Tiered Water Rates. The average production cost for all water produced with all sources combined is \$0.72 per HCF or \$313.63 per acre foot of water produced. The average production cost for all water produced during 2019 with Well 11 running with a generator was is \$1.46 per HCF or \$635.97 per acre foot of water produced. The income during 2019 for all the water produced was \$2.21 HCF or \$962.68 per acre foot. The current average income for water produced is \$1.84 per HCF or \$801.50 per acre foot.

With continued production at the Wrightwood Well Field, production cost remain low which will always be the primary source of water. Well 11 along with the wells installed with the Source Capacity Project will be used as a secondary source of water.

Directive 2d- Financial Assessment Questionnaire enclosed for review.

If you have additional questions or need additional information for the Directives please let me know.

Sincerely,

Chris Cummings General Manager

Sheep Creek Water Company

State Water Resource Control Board

Compliance Order NO 05-13-18R-002A1

Directive 2a- Evaluation of Financial Health

Rudolph F. Silva, CPA Lisa D. Silva, CPA

INDEPENDENT ACCOUNTANT'S REPORT ON APPLYING AGREED-UPON PROCEDURES

Governing Board Sheep Creek Water Company Phelan, California

We have performed the procedures described in Schedule A, which were agreed to by Sheep Creek Water Company (the specified parties), on the financial health for the period ended December 31, 2019. The management of Sheep Creek Water Company (the System) is responsible for providing finance and accounting data use for evaluating and compiling specific exhibits as of December 31, 2019, as they relate to Compliance Order No. 05-13-18 R-002A1 Source Capacity Violation issued by the State Water Board. The sufficiency of these procedures is solely the responsibility of the Sheep Creek Water Company. Consequently, we make no representation regarding the sufficiency of the procedures referred to below either for the purpose for which this report has been requested or for any other purpose.

The procedures and associated findings are described in *Schedule A*.

This engagement to apply agreed-upon procedures was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. We were not engaged to and did not conduct an audit or review, the objective of Sheep Creek Water Company, which would be the expression of an opinion or conclusion, respectively, on the financial statements of as of December 31, 2019. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

Our report is solely for the purpose set forth in the first paragraph of this report and is not intended to be and should not be used by anyone other than these specified parties. This report relates only to the State Water Board directive per Section 116530 of the California Health and Safety Code, and items specified above and does not extend to any financial statements of Sheep Creek Water Company, taken as a whole.

Brea, California August 25, 2020

Tiloz + Silva con's

Schedule A

The following procedures were completed over the Sheep Creek Water Company per Section 116530 of the California Health and Safety Code.

1. Overall evaluation of the financial health of the System using the past five years Accountant's Compilation Report Balance Sheet and Statement of Income and Expenses.

Results

- a. Worksheet presented below demonstrates the system's ability to maintain consistent fee structures that are fiscally sound to manage operating expenses. For the five-year period from 2015 through 2019, revenues increased by 66% compared with expenses by 59%. Actual water consumption to fees collect is showing reduced water usage of 83% over the same five-year period. Additionally, during 2018 the system implemented a Tier rate structure that has improved fiscal health while enhancing responsible water usage.
- b. Cash on hand ratios shows the System has maintained a range of 45 days to 251 days at December 31 date for the five years (2015 to 2019). Additionally, the system has met current payments to vendors on a timely basis.
- c. Additionally, working capital ratio has remained positive over the years. Only one situation was noted when unusual legal costs were paid by installments.

Summarized below are the past five fiscal years ended December 31:

| | | 2019 | 2018 | 2017 | 2016 | 2015 |
|---|----|-------------|-----------------|-----------------|-----------------|-----------------|
| Cash | \$ | 282,176 | \$ 449,371 | \$ 592,015 | \$ 296,629 | \$ 89,012 |

2. Evaluation of management and outstanding debt along with impending debt because of the order.

Results

- a. Over the past five years, debt service coverage ratios have averaged above 1.10% (net income over debt payments), and all debt payments have been made in accordance with terms. The debt service payment have been for skip loader from CCH industrial for \$ 91,388 (five years starting in 2016 at 3%), Vehicles loans ranging from \$22,830 to \$52,050 (2 or 3 year terms at 4% to 5%) and Shareholder loans ranging from \$80,000 to \$400,000 (five-year terms at 5% to 6.5%.All Shareholder loans were entered into for specific projects designated by the Board of Directors.
- b. In June 2020, the System entered into a Single Advance Term Promissory Note with average interest rate of 2.4% currently in an amount not to exceed \$410,000 to refinance the Shareholder loans into one payment. Payments will begin on July 2020 over four years at approximately \$8,900 monthly.
- c. In June 2020, the System entered into a Multiple Advance Term Promissory Note with a variable rate at under a Converted Term Loan with 3 different Tranches starting June 20, 2021, not to exceed \$4,000,000. Payment will begin following the first June 20, 2021, date over a 20-year period. The Multiple advances will correspond to the project order dates for Wells #12, #13,#14 and #15 (starting in 2021 to 2023).
- 3. Evaluation of financed documentation and demonstration of how funding (new proposed fee structure) with be obtained throughout the loan terms for repayment.

Results

- a. As noted above, the system obtained a \$4 million Multiple Advance Term Promissory Note with term flexible to meet the installation of four wells as outlined in the order.
- b. The system has the following 2 options showing detailed schedules to repay the new funding over a 20-year period. The System has not conducted a vote as of this report to determine which option will be implemented.

Overall increased rates are comparable to other water agencies when comparing base fee and water usage fees combined.

| | ject cost per met ion 1 | er servic | e (Base F | Rate) | | | | Estimated | Estimated | |
|-----|----------------------------|---------------|------------------|---------------------------|---|-------------------------|----------------------|--------------------|--------------------------------|---|

| DEC | | - | - | - | - | | |
| | \$ 5,531,682.00 | \$ 19,594.69 | \$ 11,032.81 | 5,546.47 | \$ 36,173.97 | \$ 4.89 | |

Average cost per of water from Well 11 during normal full-time operating conditions - \$4.47 per HCF / \$1,947 per Acre Foot

Results:

- a. The system has project cost for Wells #12, #13 and #14 using the recent implemented Well #10 as a standard to estimate future additional operating costs. Assuming the new wells along with well #11 produce what well #11 produced last year, the estimated usage would be approximately 40-acre feet. Estimated cost to produce is \$1,947 per acre foot. The 40-acre feet could be divided between wells #11, #12, and #13. During non-drought years, wells #11, #12, and #13 would have minimal use since the Wrightwood Well Field will supply the needed water and is much more cost effect to operate.
- b. Based on assumed operating usage the anticipated additional cost would range from \$19,470 to \$77,880 (usage ranging from 10 to 40-acre feet). Additional operating usage costs will be managed by the proposed rate structure being implemented in 2020.
- 5. Evaluation of management and status of the System's reserve funds

| | 2019 | 2019 2018 | | 2016 | 2015 | | |
|----------------------|------------|------------|------------|------------|-----------|--|--|
| Assessment | \$ 93,276 | \$ 231,668 | \$ 229,196 | \$ 978 | \$ 986 | | |

6. Provide a summarized conclusion on the overall current and anticipated financial health

Results:

- a. For the current financial health, the System has demonstrated over the past 5 years to be fiscally responsible for managing overall operations which includes maintaining cash flows, working capital, collections of receivables, and meeting debt obligations while providing members demand for quality water.
- b. As for the anticipated financial health, the System has worked diligently to secure the required flexible funding for additional water capacity, refinanced existing shareholder loans under lower rates, established funding option that are comparable in current market fee structures and project a multi-year budget that demonstrates adherence to future operations.

State Water Resource Control Board

Compliance Order NO 05-13-18R-002A1

Directive 2c- Operational Cost of Well 11

(Including Total Production Cost per HCF & Income per HCF)

Well #11 Operation & Maintenance Cost

Well 11 cost are covered under Tier 2 and Tier 3 charges. During the 2019 year, a diesel generator was used to operate the well due to easement issues with Southern California Edison. Electrical power was completed in October 2019

State Water Resource Control Board Compliance Order NO 05-13-18R-002A1 Directive 2d- Financial Questionaire

Financial Assessment Ouestionnaire for Disadvantaged Medium/Large CWS

Asset Management

- 1) Do you have as-built drawings and maps of all water system facilities showing the locations of each water source, treatment facilities, pumping plant(s), storage tanks, water mains, isolation valves, etc.? Most facilities have drawings. When were the schematic drawings and maps last updated? Drawings are typically updated when facilities are installed. Some facilities do not have drawings.
- 2) Do you have an asset inventory? Inventory available for most of the assets.
- 3) Do you evaluate assets for their condition and/or criticality of repair, rehabilitation, or replacement? No detailed evaluation. What is the date of the last evaluation? No Date
- 4) Do you have an asset management plan? Not at this time, in process. What is the date of the plan? No Date

<u>Strategic Plans</u> - <u>Master Plan</u> / <u>Capital Improvement Plan</u> / <u>Facility Replacement and Refurbishment Plan</u>

- 5) Do you have a Master Plan (MP), Capital Improvement Plan (CIP), or another strategic plan? Master Plan. What is the date of the last update? 2006
- 6) What percent of your annual budget is allocated to CIP reserve? Capital Improvement Funds are determined by a portion of Tier 3 water sales. How often is the CIP Reserve funded? Monthly. Is the annual amount funded to the CIP reserve equal to or greater than the amount of depreciation of system assets? Less.

Reserves Management

- 7) Do you maintain separate reserve funds? Yes If so, do you have the following types of reserve funds:
 - a. Debt Choose an item. What percent of your budget is deposited annually? Choose an item.
 - b. Operations Choose an item. What percent of your budget is deposited annually? Choose an item.
 - c. Emergency Choose an item. What percent of your budget is deposited annually? Choose an item.
 - d. Capital Choose an item. What percent of your budget is deposited annually? Choose an item.
 - e. 4 reserve accounts are dedicated for improvements and maintenance.
 - System Upgrade Account- \$3,750 per month transferred from monthly service charge for the use of maintenance and upgrades to the system such as but not limited to new or replacement fire hydrants, gate valves and regulator stations.

- Well Account- \$0.25 per HCF of water sold transferred monthly. Well Account is used for well maintenance and well rehabilitation. Replacement water funds for Mojave Watermaster are transferred into the Well Account. Replacement water is due to wells within the Mojave Water Adjudication that do not have water rights. Currently funds are low in this account due to being a new reserve account. Account was previously used for well loan repayments.
- Capital Improvement Account- \$2 per HCF of water sold in Tier 3 is transferred monthly into the Capital Improvement Account.
- Assessment Account- \$1.13 per HCF of water sold in Tier 3 is transferred monthly into the Assessment Account. The Assessment Account is used for large capital improvement projects (New Wells, New Tanks etc.). The Assessment Account is currently being used for the CoBank Loan for the Source Capacity Project.
- 8) Are there specific deposit and withdrawal policies or guidelines for the reserve accounts? Monthly Transfers are based on the water usage for the month.
- 9) Do you have mutual aid arrangements in place? Yes
 - a. Do you have a funding mechanism in place to support mutual aid requests? No

Debt Management

- 10)Do you have any outstanding private, State, or Federal loans related to the water system?

 Yes. If so, what is the date of final debt payout? 2 private loans currently being refinanced.

 Is the water system delinquent or in default on any debt(s)? No
- 11) Are all the necessary debt reserve requirements met? In process to meet reserve requirements for Source Capacity Project Loan
- 12) Is the water system utilizing long-term debt to finance operations? No, long term debt has been used to rehabilitate wells and line replacements.

Financial Budgeting

- 13) Is your drinking water system budget maintained separately from other utility or service budgets? There is one budget for the Company
- 14)Does your drinking water system prepare an annual budget document for the upcoming year's operating plan, clearly identifying the projected revenue? Budget is prepared annually to include operating expenses and projected income with projected water sales. Is this budget adopted before the beginning of the fiscal year? Budget is adopted in November/December to begin for January.

Financial Planning

- 15) Have revenues been sufficient to cover expenses for the past three years? Yes
 - a. Are total revenues sufficient to cover total expenses (including the debt payment, CIP upgrades, and the costs of emergency maintenance)? At this time, current revenue will not cover newly acquired line of credit for Source Capacity Project.
 - b. Are rates high enough to meet short term and long-term needs? Yes for short term, long term will need to be evaluated at a later date.

- c. Is there a formal growth-pays-for-growth policy and is it reflected in the rate structure? No
- d. When was the last rate increase? January 2019
- e. When were water rates last evaluated? September 2018
- 16) What percentage of customers do not pay their bill? Choose an item. Is non-payment absorbed into the budget? No payment arraignments are made with customers to pay their bills. Are there reserves maintained to make-up for customer non-payment? No unpaid accounts can be attached to the Shareholders share and will be collected when a share is sold.

Financial Accounting

- 17) Does the water system have formal accounting systems and written procedures for financial records? SCWC uses Quickbooks with additional booking completed by outside CPA who also completes tax returns, quarterly payroll returns and year end financial report.
- 18) Who records financial transactions? Accounts Payable Secretary (April Chaplin) / outside CPA Who approves financial transactions? General Manager (Chris Cummings)
- 19) How often are bank statements reconciled against the water system's accounting records?

 Monthly Who performs the reconciliation? Accounts Payable Secretary (April Chaplin) / outside CPA

Financial Reporting

20) Are financial reports/standard financial statements prepared for review by the governing board/auditor? SCWC CPA How often? Annually. Are these reports and standards routinely made available to system customers? Yes, Uploaded to SCWC Website and mailed to Shareholders with Annual Meeting Packet.

Board Memhers Training

21) Have board members received training on financial budgeting and obligations, if applicable? Board has received AB54 and AB 240 required training.
